

Alaska Psychiatric Institute – Fact Sheet Press Conference: CMS Certification Monday, August 5, 2019

ABOUT API

- API provides emergency and court-ordered inpatient psychiatric services.
- This 80-bed facility is operating on reduced capacity due to a limited staff. The number of patients receiving treatment has increased from 25 in December 2018 to 42 on Aug. 1, 2019 with ongoing growth expected.
- A joint team of API and Wellpath employees are currently managing the daily operations of the facility. Wellpath is under contract to provide hospital administration services through December 31, 2019.

RELEVANT REGULATORY AGENCIES

- *Centers for Medicare and Medicaid Services (CMS)*: The federal agency which certifies that health care facilities meet standards – also known as conditions of participation – in order to receive federal payments from Medicare or Medicaid programs. In January 2019 CMS notified API of their intent to terminate the hospital's participation in Medicare and Medicaid; that termination action was withdrawn on July 29, 2019 when API was fully certified by CMS.
- *The Joint Commission (TJC)*: An independent, nonprofit organization that evaluates and accredits health care organizations on standards related to care, treatment and services; environment of care; leadership; and screening procedures. TJC renewed API's three-year accreditation to provide psychiatric care on April 3, 2019.
- *Alaska Health Facilities Licensing & Certification*: A unit within the Alaska Department of Health & Social Services Division of Health Care Services that inspects and licenses health care facilities to operate in the State of Alaska. Also the CMS-designated state survey agency that inspects health-care facilities and investigates complaints to ensure that health and safety standards are met for the federal agency.

TIMELINE OF KEY DATES

March 8, 2018 – DHSS requests independent investigation of workplace safety at API

Sept. 12, 2018 – Dept. of Law and DHSS release findings of independent workplace safety investigation at API

Oct. 13, 2018 – DHSS Emergency Operations Center activated to respond to psychiatric care capacity emergency
