

## Alaska vendors with zero tobacco sales in 2009 to under-age customers

This list recognizes vendors and their employees who have successfully met state laws against the sale of tobacco to Alaskans age 18 and younger, and did not sell to undercover youth.

Tobacco use remains the leading cause of preventable death and disease in the United States and its economic costs are staggering: more than \$96 billion per year in direct medical expenses and more than \$97 billion annually in lost worker productivity nationwide. In Alaska, medical and lost worker productivity costs more than \$380 million each year. (Source:

Preventing youth from starting to use tobacco is a core goal of Alaska's comprehensive plan to reduce tobacco-related disease, and it's been working. In a 2009 survey, 16 percent of youth reported smoking in the past 30 days, down from 37 percent in 1995.

**Thank you, retailers, for your vigilance!**
