FIRST TIME TRYING EDITIONS?

START LOW • GO SLOW

HERE'S SOME HELPFUL ADVICE:

1. Be aware you are a chronic consumer: be aware that consuming a moderate-sized portion is usually more intense and very different than smoking.

2. Start with low doses and allow time for effects to take place.

3. Treat chronic effects by taking in tiltable delays to help manage.

4. Be prepared to handle side effects, such as dry mouth, nausea, or dizziness.

5. Stay calm and take breaks if necessary.

6. Do not drink alcohol while under the influence.

7. If you experience any adverse effects, seek medical attention immediately.
