Medication Administration

7 AAC 10.1070. Medications. (e).

- ▶ 12 AAC 44.990. DEFINITIONS:
 - ▶ “Administration of medication” means the direct application of a medication to the body of a patient by inhalation, ingestion, or other means;
- ▶ Medication administration is an intermediate Nursing Service which requires a license to perform the task.
 - ▶ However, medication administration is a delegatable task, which means with training, a licensed professional (in most cases a Registered Nurse) can delegate a caregiver the ability to perform the task, medication administration, under their license.

Delegating Medication Administration

12 AAC 44.965. DELEGATION OF THE ADMINISTRATION OF MEDICATION.

- ▶ To delegate Medication Administration a course is required to be taught by RN or LPN.
- ▶ The course taught must be approved by the Board of Nursing.
- ▶ The Board of Nursing has an approved course that can be used at the hyperlink below:
<https://www.commerce.alaska.gov/web/cbpl/professionallicensing/boardofnursing/increasingscopeofpracticeduties.aspx>
- ▶ An approved written test is available with the Board of Nursing.
- ▶ Documentation must be maintained in personnel file.

Delegating Medication Administration

12 AAC 44.965. DELEGATION OF THE ADMINISTRATION OF MEDICATION.

- ▶ PRN medication means medication to be taken “as needed” by the patient.
- ▶ PRN **controlled** substances cannot be delegated by a nurse.
- ▶ PRN **non-controlled** substances can be delegated by a nurse.
- ▶ They require an assessment by a nurse.
- ▶ Written instructions are required – when to give, the procedure (dosage amount, frequency, duration), & when to call the nurse.

Delegating Medication Administration

12 AAC 44.965. DELEGATION OF THE ADMINISTRATION OF MEDICATION.

- ▶ Once Staff have received training and the delegating Nurse approves the individual, they may begin Administering medication to residents that have given the Home written permission to administer medication.
- ▶ Even if staff are completely trained on medication administration, the Resident and/or their Representative must give permission for the Home to administer medication.

Understanding Delegation

12 AAC 44.950. STANDARDS FOR DELEGATION OF NURSING DUTIES TO OTHER PERSONS.

- ▶ Medication Administration is not the only nursing service that can be delegated.
- ▶ If you are being delegated a task by a Licensed Nurse you must demonstrate the following:

 - ▶ You must be accountable and competent to safely perform the duty and accept the delegation.

Understanding Delegation

12 AAC 44.950. STANDARDS FOR DELEGATION OF NURSING DUTIES TO OTHER PERSONS.

- ▶ There may be situations where an unlicensed caregiver can perform a task, but a CNA cannot.
- ▶ For example:
 - ▶ A resident's legal representative may be able to train and delegate a task to an unlicensed caregiver, but a CNA's license would prohibit.
- ▶ Please Note: Other legal authority may be able to delegate a nursing task that a nurse may not. However, sufficient training will be required and it may not satisfy Licensing standards
