#### **Child Care Assistance Program Rates**

The *Child Care Assistance Program Rate Schedule* establishes a "state rate" to be paid to the child care provider on the behalf of families determined eligible and participating in the Child Care Assistance Program (CCAP). These rates may be different than the provider's actual charges for child care services, in which case the family is responsible for paying the provider the difference, in addition to the family's established co-payment based on family size and countable gross monthly income. The CCAP state rates are designed to provide families participating in the CCAP, equal access to quality child care programs.
