

Good morning. Another short Friday Update for you this week:

There are five attachments:

1. Infant application: It rearranges the order of the information requested in the first line. The former format was confusing; people sometimes skipped date of birth. In this version, date of birth is separated from birth weight, and the date the application is completed has been moved up.
Thank you, Dana, for pilot testing the earlier version with your fellow UAT trainees- this version incorporates their suggestion.
2. Infant formula contract: As a result of the Western States Contracting Alliance (WSCA) renegotiated contract for infant formula rebate, we now have two separate rebate contract formulas: Mead Johnson for the soy-based formula and Abbott for Similac, milk-based formula. Information on Prosobee for use by LAs and another for distribution to clients are attached. The third attachments are the product labels in English and Spanish. Informaion on Isomil will follow.
3. The final report on the Local Agency Grantee Infrastructure changes is also attached. The report has also been posted on the WIC website.

Have a great weekend, everyone!

Becky
