

Additional information on taking the Baby Behavior training:

1. Each module takes about 10 minutes. You can stop and restart at any time- but the training does not restart you where you stopped. You need to make a note for yourself to remind you where you stopped, so you can start on the right module at your next session. Open the "Baby Behavior Lesson" and go to the "Main Menu" button on the bottom left- it will take you to the list of all the modules, and you can start where you stopped the previous time.
2. When you complete the last module, it says to click on the corner "x" and you'll be taken to the quiz. That feature is not working. Please go back to the main menu and choose "Baby Behavior Self Check".
3. When you complete the "Self Check" you can go to the certificate from the Baby Behavior main menu- it's the bottom icon and it's called "DPA WIC Baby Behavior Training"
4. Open the certificate and save it for yourself- opening it will cause the system to record that you finished the training.
5. Print the certificate if you would like.
