Dear Valued Partner,

I'd like to personally invite you to our next live Human Milk Monthly Webinar presented by [Irene Zoppi, RN, MSN, IBCLC](#) on July 20 from 1:00-2:00 pm central. Ms. Zoppi will present the topic "[*Fitting Breast Shields: Determining the Correct Breast Shield Size*](#)".

This 1.0 credit hour webinar is great for WIC staff, peer counselors, lactation counselors, or any professional working with breastfeeding families that wants to obtain a fundamental understanding of the process for properly fitting breast shields. The presentation includes a review of [Dr. Donna Geddes'](#) ultrasound work regarding the anatomy of the lactating breast and describes how milk removal is hindered by ill-fitting breast shields.

Learning Objectives:

- Describe how incorrectly fitted breast shields impact milk removal while pumping.
- Explain how to correctly fit a breast shield.
- Identify signs a breast shield is properly fitted.

Registration is complimentary at www.MedelaEducation.com and provides 1.0 CE's for nurses and dietitians.

Let me know if you have questions, and I hope you can join us for this enlightening live discussion on Wednesday, July 20, 2016.
