

September 1, 2016

9:15

Call in number: 1-800-281-5354

Code: 646725

AGENDA

1. Food substitutions at the store-

Substitutions are not allowed at the store. Milk and formula substitutions are frequently substituted items which if allowed can lead to losing rural stores as WIC approved. It's both the participant and the vendor's responsibility not to allow this to happen. Please remind and continue to educate participants of this issue.

2. Infant food checks with high rates of rejection

3. Bananas on infant FI-

Jennifer will send out the suggested wording on the FI. There was discussion regarding whether the bananas are to remain on the FI. It may be possible to allow two items to select from f/v with bananas and one selection without. The decision to take or not take bananas would have to be made at the clinic. Please notify a state staff member of your thoughts.

4. Pediasure-

Discussion surrounding whether to add the additional nomenclature (Grow & Gain) onto the FI. Need to change the ENPR to reflect new wording if change on the FI. Decision yet to be made.

5. Discussion on what is the best way to offer LA available resources-

Consensus was once per month in the Friday Update with pictures.

6. How is the best way to verify received warrant stock.

Consensus was via email.

7. Update to MOV food package revision

8. Soy package updated last night to accommodate 8th Continent milk- ½ Gallon Soy Milk

Be sure to "Reset Local Reference Data" to see the new soy milk selection in ½ gallons

If a participant selects 1/2 gallons of soy at the clinic, make sure it is available in your region.

9. Masimo non-invasive hemoglobin machines; bring one plus some adult sensors to the WIC

Coordinator meeting for training purposes; orders will arrive before the meeting; everyone should bring them (pilot sites as well: NSHC, Maniilaq, YKHC).

10. GDM RF 302-

If assigned during the CGS it stays on a participant record though their course of WIC (as a breastfeeding, postpartum woman and for upcoming pregnancies as well). A work around is to

not assign it during the CGS but add it manually afterwards. The RF is then dropped in the future once it no longer applies.

1. Select Default food package then delete the milk.

Effective Date of Food Prescription

Quantity	UOM	Item
13	QUART	QUART(S) FAT-FREE OR 1% FRESH MILK
1	PKG	PKG(S)-16 OZ-WIC APPROVED CHEESE (3 quarts of milk product)
