

Alaska EMT – II Vocabulary List

July, 2003

acidosis	embolism
activated charcoal	Fick principle
adequate	flail chest
adsorption	fluid resuscitation
advanced airway device	flush
aerobic metabolism	focal seizure
afterload	gag reflex
alignment	gastrointestinal
alkali	Glasgow Coma Scale
amniotic sac	heart rate
anaphylaxis	hematoma
angulated	hemorrhage
antecubital	hemothorax
aseptic technique	hyperextend
aspiration pneumonia	hypertonic
auscultation	hypertrophy
axial	hyperventilation
bacterial contamination	hypervolemia
balanced salt solution	hypotensive
bloodborne pathogens	hypothermic
bolus	hypotonic
bradycardia	hypovolemia
bronchodilator	hypovolemic shock
cannulated	impaled
cannulation	in accordance with
cardiac dysrhythmias	inactivates
cardiac output	inadequate
cerebral	Incident Command
colloids	System
Combitube	infiltration
compensated	infuse/infusing
constricting	interstitial fluid
core temperature	intervascular fluid
crepitus	interventions
cricoid	intramuscular
crystalloids	intraosseous
cyanotic	isotonic
delegated	jugular venous distention
dependent edema	JVD
dextrose	laryngospasm
diffusion	legally defensible
dilating	lucid interval
distension	meconium
drowsiness	metabolized
edema	neurogenic shock
efficiency	neutral
	neutralize

normovolemia
occlusion
oropharyngeal
osmosis
osmotic
oxygenation
paradoxical movement
parasympathetic
pedal
pelvic sheet wrap
percussion
perfusion
perineum
peripheral
petit mal seizure
pH
phlebitis
placenta
plasma expanders
pleural space
pneumothorax
post-exposure
preload
protocol
pulmonary
pulmonary edema
regulation
respiration
semi-permeable
septic shock
sinoatrial dysfunction
sniffing position
solute concentration
stabilized
status epilepticus
statutes
stroke volume
subcutaneous
subcutaneous
 emphysema
sympathetic
symptomatic
systemic vascular
 resistance
tarry
tension pneumothorax
tinged
tonic-clonic
torso
tracheal deviation
vasoconstriction
vasodilation
venipuncture

ventilation
