

Alaska EMT – III Vocabulary List

July, 2003

3° AV block
AC interference
afterload
aggressive
agonal rhythm
angina pectoris
aorta
arcing
artifact
associated
asystole
automaticity
A-V conduction
bolus
bronchoconstriction
bronchodilation
cardiac contractility
cardiac cycle
cardiac output
cardiac tamponade
cardiogenic shock
carotid massage
conductivity
contractility
decompensated
deep fascia
depolarization
dermis
device
diastole
distributive shock
dysrhythmia
ectopic/s
endotracheal tube
epidermis
fibrillation
Fick principle
glottis
homeostatic
hypertonic
hypotonic
hypovolemic shock
Incident Command System
integumentary
interventions
intracellular
intraosseous line / IO
ischemia
isotonic
joules
metabolized
monophasic
myocardium
narrowing pulse pressure
neurogenic shock
osmolarity
pacemaker
parasympathetic stimulation
Parkland Formula
peripheral
peripheral vascular resistance
posterior tibial artery (pulse)
preload
psychogenic shock
pulmonary
pulmonary artery
pulmonary vein
pulseless electrical activity
pulseless ventricular
 tachycardia
reflex bradycardia
resistance
Starling's Law
stroke volume
subcutaneous
submersion
substernal
superior vena cava
supraventricular tachycardia
systemic vascular resistance
systole
tonic-clonic
transient ischemic attack
tripod position
vallecula
valsalva
ventricular fibrillation
ventricular fibrillation threshold
vesicular
