

CASE INCLUSIONS/EXCLUSIONS EXAMPLES

Last updated 10-01-2015

ICD10 Diagnosis Codes to Include: S00-S99 A,B,C; T07, T14, T20-T28*,
T30-T32, T33-T34*, T73-T76*, T79*

ICD10 E Codes to Include: V00 – Y38.9

ICD10 Place of Occurrence: Y92

ICD10 Activity Codes: Y93

Included: ED Admit/ Direct Admit, Transfers, Observations, AMA, and Death

Note: DOA Included signed in to ED for evaluation/treatment. Excluded if taken straight to morgue

Included in the trauma registry are injuries due to:

- Crashes: motor vehicle, snow machine, ATV, boating, airplane
- Falls
- Fires (include smoke inhalation)
- Animal bites (cat, dog, bear, etc)
- Effects of reduced temperature: hypothermia and frostbite
- Suffocation: near drowning or drowning, strangulation
- Struck by object or person
- Foreign body (see algorithm)
- Caught between objects
- Machinery injuries
- Cuts and lacerations
- Burns: caustic agents, sunburns, electricity
- Intentional injury: assault, homicide, suicide and suicide attempt
- Pediatric poisoning and toxic events: over doses and poisonings, recreational and unintentional, of children ages 0 through 17 (see algorithm)
-

DO NOT INCLUDE in the trauma registry:

- Suicide and suicide attempt by poisoning ages greater than or equal to 18yo (see algorithm)
- Overexertion by lifting, twisting or pushing or bending over
- Injury caused by pre-existing conditions: osteoporosis (fracture), esophageal strictures (choking or food boluses)
- Injures greater than 30 days old
- Adult poisonings: *intentional and* unintentional overdose/poisoning age 18 and older (see algorithm)
- Insect bites
- Cellulitis
- Pediatric poisonings due to drug toxicity on prescribed medications (Tegretol toxicity, Dilantin toxicity, etc)
- Paralytic shellfish poisoning (PSP) or botulism or food poisoning including mushrooms. (These are already reportable to the State)

Special cases:

- Reoccurring injuries: an elderly person with chronic hip dislocations without any excess force (bent over, sat up). If there is a force, a fall, tripped, etc, then enter them the first time but not subsequent times if this is an injury that would not have occurred in a healthy person.
