State regulation (5 AAC 92.410(b)) requires any person killing a game animal in defense of life or property (DLP) to submit a written report to the Department of Fish and Game within 15 days of the incident. This form, properly filled out, satisfies that requirement.

Persons shooting game under this DLP regulation also must salvage the skull and hide (for bears, wolves, etc.) or meat (for moose, caribou, etc.) and surrender it to the state. For bears, the salvaged hide must have the claws attached.

The report should be completed by the person who killed the animal. If that person cannot complete the form, the agency official (ADF&G staff person, FWP officer, police officer, etc.) who talks to the person who shot the animal, or who initially receives information from the shooter should complete this report. This official should attach a copy of the sealing form (if available) and any other documentation submitted by the shooter and return this report to the above address without delay.

Accurate and complete information is essential to help the department understand why people have conflicts with bears and other wildlife and how these conflicts can be minimized. Thank you for your cooperation.
