# Epidemiology: Cases by Borough

# COVID-19 Data: Weekly Cases by Age Group

# Alert Level Map: 14-day Case Rate Map

## COVID-19 Alert Level

### Alert Level

Case Rate (Avg Last 14 Days)

- > 10 High
- 5-10 Intermediate
- <5 Low

ALERT LEVEL	Average daily incidence over the past 14 days	Interpretation
HIGH	>10 cases per 100,000 population	Widespread community transmission with many undetected cases and frequent discrete outbreaks
INTERMEDIATE	5-10 cases per 100,000 population	Moderate community transmission with some undetected cases and infrequent discrete outbreaks
LOW	<5 cases per 100,000 population	Minimal community transmission

5.6 per 100,000

Statewide

Interpretation: A statewide average of 5.6 case per 100,000 persons per day in the past 14 days.

# 7-day Case Rate Map

## 7-Day Case Rate Map

**7.0 per 100,000**

**Statewide**

Interpretation: A statewide average of 7.0 case per 100,000 persons per day in the past 7 days.

# Statewide Percentage of Daily Tests with Positive Results

Statewide Percentage of Daily Tests with Positive Results

(Three day rolling average)

Does not include serology tests (e.g. antibody blood tests). Public Health Lab results may be delayed up to two days. Inconclusive results are excluded from this measure.
