Complete for students enrolled in Preschool

For the purposes of immunization compliance, a child in “kindergarten” is one who was born prior to September 2 at least five years prior to kindergarten entry. For example, a child entering kindergarten in 2012 must have been born before September 2, 2007. Children who do not meet the date of birth criteria will follow the requirements for “preschool”. (Definition of kindergarten age criteria established by the AK Department of Education and Early Development.)

Head Starts, private preschools, and child care facilities are responsible for ensuring their attendees are compliant and will submit their own reports. Children attending these facilities who are *not* enrolled in your school will *not* be counted in your figures even if those programs are located within your school.

In order to determine if a student is compliant with Alaska immunization requirement, you must consider:

- the student’s age
- the student’s grade
- whether the student’s vaccine history indicates: (a) verification by a medical provider, and
(b) complete dates for all doses received, and
(c) valid spacing of doses, or
(d) valid documentation of immunity or exemption

Compliance information may be found in the *State of Alaska Child Care & School Immunization Requirements Packet Revised 08/2010*.

This packet may be obtained from the Alaska Immunization Program or found on the Web at: www.epi.alaska.gov/immunize
