

Improving practice outcomes in core set measures

Example PDSA Cycles

Demonstration sites reported on a prioritized subset of the CHIPRA core measures in 2012 and 2013

Results

- Reporting on CHIPRA measures brought focus and improvement in specific areas
- TCHIC support pushed child measures to the top
- "Data steward" for each clinical area greatly improved priority setting process for proposed clinical measures to track improvement
- Action lists for integrated care teams built a sense of responsibility
- Coordinated CG-CAHPS PCMH patient experience of care survey project including non-TCHIC clinics
