

Alaska State Virology Laboratory (ASVL) Weekly Report – Week #29

July 15 - 21, 2018

(This report was prepared by Jayme Parker, Public Health Microbiologist III at the Alaska State Virology Lab in Fairbanks, Alaska)

The Section of Epidemiology is the primary contact for consultation for the following potential active infections: rabies, norovirus, measles, mumps, rubella, varicella zoster, and novel influenza. Please direct your calls to the Epi-Team at 907-269-8000; or their 24 hour # 1-800-478-0084. **For information regarding mumps infections in Alaska, please visit:**

<http://dhss.alaska.gov/dph/Epi/id/Pages/Mumps.aspx>

1. Mumps virus

Specimens collected from patients with suspected mumps infections (or any vaccine preventable infection) are tested by the APHL/CDC Vaccine Preventable Disease Reference Center in California. If Mumps RNA is detected, genotyping is attempted at the California laboratory. Please see additional information regarding mumps and mumps genotypes at cdc.gov/mumps.

Collection Date Range: 6/28/2017 – 7/21/2018

# AK Specimens Tested by APHL/CDC Reference Center	Mumps RNA Detected	Genotype G
821	295 (35.9%)	113

*These mumps numbers are not the official numbers for the outbreak and only represent specimens routed through the Alaska State Public Health Laboratories. They are presented for illustrative purposes only and should not be reported in any external reports or media.

2. Influenza virus

PCR Testing for Week #2018-29 TP: true positive, FP: false positive, TN: true negative, FN: false negative. True = 2 tests concur, False = 2 tests do not concur Collection Date Range: 5/10/2018 – 7/12/2018		Corresponding Influenza Sentinel Providers Results								
		Rapid Influenza Test Results				PCR Test Results				No Data
ASVL PCR Results		TP	TN	FP	FN	TP	TN	FP	FN	
Influenza A/H1 2009 pdm Positive										
Influenza A/H3 Positive										
Influenza A (subtype pending)										
Influenza B Positive										
Influenza Negative	24						24			
Influenza Inconclusive (PCR inhibitive)										
Total # Specimens Tested	24	0	0	0	0	0	24	0	0	0
Summary: Influenza vaccine strain match (specimens collected between 6/1/2018 – present)										
# AK Specimens Tested by CDC	Results	Most closely related subtype				Match with 2017–2018 flu vaccine?				
0 Influenza A/H3 viruses		<i>*No viruses tested from recent collections (after 6/1/18). Results from antigenic testing will update as summer viruses are further characterized.</i>								
0 Influenza A/H1N1 viruses										
0 Influenza B virus (Yamagata)										
0 Influenza B viruses (Victoria)										
Summary: Influenza antiviral resistance surveillance (specimens collected between 6/1/2018 – present)										
# AK Specimens Tested by CDC	Results	Description								
0 Influenza A/H3 viruses		<i>*No viruses tested from recent collections (after 6/1/18). Results from antiviral resistance testing will update as summer viruses are further characterized.</i>								
0 Influenza A/H1N1 virus										
0 Influenza B (Victoria)										
0 Influenza B (Yamagata)										

Alaska State Virology Laboratory (ASVL) Weekly Report – Week #29
July 15 - 21, 2018

For recent specimens collected in week #29 (July 15 – 21, 2018): 0 of 0 respiratory specimens were positive for influenza (0.0% positive). Additional specimens from this collection date range are pending due to transit delays or further subtyping, thus percent positivity will adjust as specimen results become available.

3. Hepatitis C virus (HCV)

For recommendations on types of Hepatitis C testing, test interpretation and post-test patient counseling:

- CDC MMWR: <http://www.cdc.gov/mmwr/preview/mmwrhtml/rr6104a1.htm>
- 5/27/15 AK Epidemiology Bulletin: http://www.epi.alaska.gov/bulletins/docs/b2015_11.pdf

HCV Antibody screening	Total Tested	Total Positive (%)
Week #2018-29	129	28 (21.7%)
Last 12 month period	6,074	887 (14.6%)
HCV RNA testing		
Week #2018-29	143	80 (55.9%)
Last 12 month period	1,069	715 (66.9%)

HCV Genotyping	Total Tested	Type 1a	Type 1b	Type 2a/c	Type 2b	Type 3	Type 4	Type 6	Unable to Genotype
Week #2018-29	80	51	4		12	13			
Last 12 month period*	715	405 (56.6%)	32 (4.5%)	7 (1.0%)	95 (13.3%)	141 (19.7%)	8 (1.1%)	0 (0.0%)	27 (3.8%)

*HCV genotyping data includes 4 coinfections (3 specimens with subtypes 1a & 3, 1 specimen with subtypes 1a & 2b)

Alaska State Virology Laboratory (ASVL) Weekly Report – Week #29 July 15 - 21, 2018

4. Human Immunodeficiency virus (HIV)

HIV Antibody screening (4 th Generation)	Total Tested	Total Confirmed Positive
Week #2018-29	176	0 (0.00%)
Last 12 month period	8,038	16 (0.20%)

5. Norovirus Outbreaks

- No new outbreaks to report.

6. Rabies virus - Human Exposures

- No new cases to report.

7. Respiratory Syncytial Virus (RSV)

*Surveillance of RSV using a PCR assay that does not differentiate groups A from B began 2/27/2017.

PCR testing	Total Tested	Total Positives (% pos)	Total Positive RSV A (% of pos)	Total Positive RSV B (% of pos)	Total Positive (RSV undifferentiated)*
Week #2018-29	0	0 (0.0%)	0 (0.0%)	0 (0.0%)	0 (0.0%)
Season 2017-2018 (current)	2,623	252 (9.6%)	3 (1.2%)	0 (0.0%)	249 (98.8%)
Season 2016-2017	5,550	383 (6.9%)	108 (28.2%)	158 (41.3%)	117 (30.5%)
Season 2015-2016	4,987	388 (7.8%)	145 (37.4%)	243 (62.6%)	0 (0.0%)

For recent specimens collected in week #28 (July 8 – 14, 2018): 0 of 0 respiratory specimens were positive for RSV (0.0% positive). Additional specimens from this collection date range are pending due to transit delays, thus percent positivity will adjust as specimen results become available.

Alaska State Virology Laboratory (ASVL) Weekly Report – Week #29
July 15 - 21, 2018

8. Respiratory Pathogen Panel Summary – by Region

Numbers reflect the total positives detected within a particular time period. Current respiratory season is 10/1/2017 – 9/30/2018. NT = Not tested

	Influenza A/H3	Influenza A/H1pdm09	Influenza A (subtype pending)	Influenza B	RSV A	RSV B	RSV (undifferentiated)	Rhino/Enterovirus	Metapneumovirus	Parainfluenza 1	Parainfluenza 2	Parainfluenza 3	Parainfluenza 4	Adenovirus	Coronavirus 229E	Coronavirus NL63	Coronavirus HKU1	Coronavirus OC43	Human Bocavirus	<i>Chlamydia pneumoniae</i>	<i>Mycoplasma pneumoniae</i>	Total Specimens Tested
