What is CUBS?

CUBS stands for the Childhood Understanding Behaviors Survey and is a three-year follow-up to the Alaska Pregnancy Risk Assessment Monitoring System (PRAMS). PRAMS sends a survey to approximately one of every six mothers of newborns in Alaska. CUBS attempts follow-up with all mothers living in Alaska who completed PRAMS and whose infant was living with them at that time. The purpose of CUBS is to collect information about health, behaviors, and experiences of young children and families in Alaska.

Among 1244 mothers who were sent the CUBS survey in 2010, 48% responded. Their answers were weighted to represent all mothers of 3-year-old children born in Alaska in 2007. The average child age at the time mothers responded was 38 months (range 35-40 months). 2.5% of mothers said their 3-year-old child was not living with them at the time.

For more information about CUBS, visit www.epi.hss.state.ak.us/mche/pi/cubs/.

For questions or for specific data requests, contact Margaret Young, CUBS Program Coordinator, at 907-269-5657 or margaret.young@alaska.gov.
