

(Q30) During the past 12 months, did you call Poison Control or seek medical help because your 3-year-old child had contact with any harmful or toxic substances?

	%	95% CI*	
No	90.3	86.1	93.3
Yes	9.7	6.7	13.9

(Q31) Did your child have contact with the harmful or toxic substance(s) in or around your home? (Among those who called Poison Control in the past 12 months.)

	%	95% CI*	
No	16.4^	6.3	36.3
Yes	83.6^	63.7	93.7

(Q32) During the past 12 months, did your 3-year-old child have any injury serious enough to seek medical help or advice?

	%	95% CI*	
No	89.0	85.0	92.0
Yes	11.0	8.0	15.0

(Q33) What event(s) caused the injury or injuries? Check all that apply. (Among those whose 3-year-old child had an injury serious enough to seek medical help in the past 12 months.)

	% Yes	95% CI*	
Fall	51.6^	35.3	67.5
Finger(s) smash	8.7^	3.5	20.2
Choking or other type of blocked airway	2.7^	0.4	16.8
Motor vehicle accident (including ATVs and snow machines)	0.5^	0.1	3.0
Animal bite or insect sting	0.3^	0.1	2.0
Other reasons [§]	36.9^	22.9	53.6

[§] Other reasons cited include dislocation of the elbow, swallowing foreign objects, placing foreign objects in the nose, running into object corners, bone fracture while playing/roughhousing, hernias, bike riding, biting lip, burned hand, falling from car and landing on head, infections and other medical conditions.

^Data may be unreliable. Number of respondents was at least 30 but less than 60.

What is CUBS?

CUBS stands for the Childhood Understanding Behaviors Survey and is a three-year follow-up to the Alaska Pregnancy Risk Assessment Monitoring System (PRAMS). PRAMS sends a survey to approximately one of every six mothers of newborns in Alaska. CUBS sends a follow-up survey to all mothers living in Alaska who completed PRAMS and whose infant was living with them at that time. The purpose of CUBS is to collect information about health, behaviors, and experiences of young children and families in Alaska.

Among 721 mothers who were sent the CUBS survey in 2015, 65% responded (472 women). Their answers were weighted to represent all mothers of 3-year-old children born in Alaska in 2012. The average child age at the time mothers responded was 38 months (range 37-41 months). 2.4% of mothers said their 3-year-old child was not living with them at the time.

For more information about CUBS, visit the [CUBS website](#).

For questions or for specific data requests, contact Margaret Young, CUBS Program Coordinator, at 907-269-5657 or margaret.young@alaska.gov.

(Q34) Did an adult ever push, hit, slap, kick, choke or physically hurt your 3-year-old child in any other way? Do not include a spanking that did not leave a bruise.

	%	95% CI*	
No	99.2	97.6	99.8
Yes	0.8	0.2	2.4

(Q41) Besides yourself, who else shares responsibility for raising your child? Do not include paid childcare providers. Check all that apply.

	% Yes	95% CI*	
My child's father	86.1	81.5	89.7
My child's grandparent(s)	36.8	31.8	42.2
Other relative(s) or family member(s)	22.8	19.0	27.1
My husband/partner (not child's father)	6.8	4.5	10.1
Other	4.1	2.5	6.7
No one else	2.8	1.3	5.7

(Q42) During a typical week, how many days is your child with his or her father (or one other adult male such as a family member or friend) for more than 1 hour? This could include doing things like reading, playing, and spending time together. Do not include paid childcare providers.

	%	95% CI*	
Every day	81.4	76.4	85.5
3 to 6 days	10.8	7.7	14.8
1 to 2 days	4.9	2.9	8.2
No days	2.9	1.5	5.8

(43a) When you are taking care of your child, how often do you watch or stay with your child while he or she plays INDOORS?

	%	95% CI*	
Always	56.7	51.0	62.3
Often	39.3	33.8	45.0
Sometimes	4.0	2.5	6.5
Never	--	--	--

(43b) When you are taking care of your child, how often do you watch or stay with your child while he or she plays OUTDOORS?

	%	95% CI*	
Always	80.1	75.4	84.1
Often	14.4	10.9	18.7
Sometimes	5.5	3.7	8.1
Never	--	--	--
