School administrator and parent consult with health care provider and other local health care professionals to develop and implement a health plan for the student. Training for school staff is provided by a health care professional.

Does the school district provide nursing services?

- Yes: School nurse develops Individualized Healthcare Plan (IHP) and, if needed, an Emergency Care Plan for student in conjunction with parent, health care provider, and school administrator.

Is a school nurse available?

- No: According to Alaska Nursing Regulations, is the medication delegable‡ by a school nurse to a school setting provider?
  - Yes: School nurse follows Alaska Nursing Regulations, school district policies/procedures, and nursing practice standards to provide medication management/administration in school and for school linked activity.
  - No: School nurse informs parent that he/she could delegate school staff to administer medication, and explains the process.

- Yes: School nurse trains appropriate staff using standardized resources approved by the school district and determines competency.

School nurse follows up training program effectiveness and need for further training according to school district policy.

School nurse evaluates student outcomes and adjusts the IHP accordingly.

*The Alaska Board of Nursing approves and supports this plan based on 12 AAC 44.950—12 AAC 44.975. Dated 4-2-2012
