

ASQ Online API Beta

Now available for ASQ Pro and ASQ Enterprise subscribers to purchase

Want to connect ASQ Online with another data management system? Now you can! With the NEW ASQ Online API (Application Programming Interface), you can link ASQ Online to your existing database management system or application. It's your easy, automated way to import and export child data, transmit new data, and update existing Child and Caregiver Profiles—so you spend less time on data entry and more time helping the children you serve.

Benefits of ASQ Online API:

- **Convenient**—connects ASQ Online with your data system so data flows easily between them
- **Saves time**—no repeat data entry needed
- **Easier data management**—all a child's information is in one place for quick reference

Automatically transfer:

- Child Profile data, including custom fields
- Caregiver Profile data, including custom fields
- Screening data, including responses to the questionnaire items, parent comments, scores, and questionnaire cutoff scores

API BETA PRICING CHART

	New Screens Each Year*	Annual Subscription Fee
Tier 1	1-200	\$150
Tier 2	201-500	\$300
