

### Handout 3: Reading labels, making a medicine list

This handout shows a prescription, the label from an over-the-counter (OTC) medicine and a blank medicine list. It also has an example of a prescription and OTC label with notes to help you understand the information on each one.

Read the information on the prescription and label and put the right information into the list.

- You won't need all of the information on each label for the medicine list.
- You may not find some information on the prescription or label. Plan to ask the doctor or pharmacist questions to get the answers.

#### Handout 3-1: Pharmacy label

	<p>Right Price Pharmacy 345 W. 35th St, Miami Fl. 33165 Phone (305) 249-5598</p>
Rx 25550-6	Dr. Hency, Robert B
<p>Sandra Birdsnest ALBUTEROL 0.83 MG/ML Equivalent to PROVENTIL 0.83 MG/ML 2 PUFFS TWICE A DAY</p>
