

UNDERSTANDING TELEHEALTH & the Role of the Telehealth Coordinator

● **2012 Classes
Begin June 19th
and September 25th**

This is the first course in the Telehealth Coordinator and Telehealth Program Manager Certification series and provides the foundation upon which the other courses will build. This 10-week online course includes an overview of telehealth and the basic knowledge necessary to understand the role of the Telehealth Coordinator in a healthcare organization. Each module contains assigned readings as well as supplemental materials to guide students in further exploration of telehealth. Online discussion will be assigned each week to assist in their analysis of telehealth issues. Students will also attend several live sessions to discuss current topics in telehealth and course assignments. Internet access, a microphone and speakers are required.

Topics include:

- Overview of Telehealth & Telemedicine
- The Role of Telehealth Coordinators
- Synchronous & Asynchronous Telehealth Applications
- Home Telehealth
- Specialty Uses of Telemedicine
- Telemedicine & Rural Providers
- Using Telehealth for Case Management & Discharge Planning
- Business Aspects of Telehealth
- Successful Telehealth Programs
- The Future of Telehealth: Summary
