- BECOMING A CERTIFIED
TELEHEALTH PROGRAM
MANAGER
October 4th

Improve your telehealth program success and growth.

Our series of three 10 week courses take learners through the full spectrum of telehealth and telehealth program management. The first course, Understanding Telehealth & the Role of the Telehealth Coordinator, provides students an overview of telehealth and the basic knowledge necessary to understand the role of the telehealth coordinator including various telehealth applications, specialty uses, rural impact, case management, business aspects, and much more.

The second course, Becoming a Certified Telehealth Coordinator, builds on the knowledge and concepts learned in the first course by providing the student the skills & tools needed to support the use of telehealth in a health care organization. The third course focuses on the knowledge and skills needed to manage a telehealth program. Find out more online at www.afhcan.org/training

Presented in partnership with the University of Alaska
