

**Alaska Section of Epidemiology
Infectious Diseases Reportable by LABORATORIES**

Updated Nov 29, 2018

IMMEDIATE REPORTING (PUBLIC HEALTH EMERGENCIES)

<i>Bacillus anthracis</i>	Poliovirus
<i>Burkholderia mallei</i>	Rabies virus
<i>Burkholderia pseudomallei</i>	Rubella virus
<i>Clostridium botulinum</i> or botulinum toxin	Rubeola (measles) virus
<i>Corynebacterium diphtheriae</i>	Severe acute respiratory syndrome (SARS) coronavirus
<i>Francisella tularensis</i>	Variola (smallpox) virus
Hemorrhagic fever viruses, including dengue	Yellow fever virus
Influenza virus, suspected novel strains	<i>Yersinia pestis</i>
<i>Neisseria meningitidis</i>	

**To report a Public Health Emergency:
Business Hours 907-269-8000 • After Hours 800-478-0084**

ROUTINE REPORTING (WITHIN 2 WORKING DAYS)

Antibiotic-resistant organisms of national significance, including vancomycin- resistant <i>Staphylococcus aureus</i> and carbapenemase-producing Enterobacteriaceae	RNA), or other viral load detection test results, both detectable and undetectable
Arboviruses, including West Nile virus	(C) Genotype results and associated HIV nucleotide sequence data; and
<i>Bordetella pertussis</i>	(D) CD4+ (T4) lymphocyte counts and CD4+ (T4) percent of total lymphocytes results of any value
<i>Borrelia burgdorferi</i>	Influenza virus
<i>Brucella</i> species	<i>Legionella</i> species
<i>Campylobacter</i> species	<i>Leptospira</i> species
<i>Chlamydomphila psittaci</i>	<i>Listeria monocytogenes</i>
<i>Chlamydia trachomatis</i>	Mumps virus
<i>Coxiella burnetii</i>	<i>Mycobacterium leprae</i>
<i>Cryptosporidium</i> species	<i>Mycobacterium tuberculosis</i>
Cyclospora	<i>Neisseria gonorrhoeae</i>
<i>Diphyllobothrium</i> species	<i>Plasmodium</i> species
Shiga-toxin producing <i>Escherichia coli</i> (STEC)	Prions
<i>Echinococcus</i> species	<i>Salmonella</i> species
<i>Giardia</i> species	<i>Shigella</i> species
<i>Haemophilus ducreyi</i>	<i>Streptococcus agalactiae</i> from normally sterile body fluid or site
<i>Haemophilus influenzae</i> from normally sterile body fluid or site	<i>Streptococcus pneumoniae</i> from normally sterile body fluid or site
Hantavirus	<i>Streptococcus pyogenes</i> from normally sterile body fluid or site
Hepatitis A, B, or C virus	<i>Taenia</i> species
Human immunodeficiency virus (HIV) tests that shall be reported include	<i>Treponema pallidum</i>
(A) tests confirming human immunodeficiency virus infection	<i>Trichinella</i> species
(B) tests used to establish the presence of human immunodeficiency virus, including serologic, virologic, nucleic acid (DNA or	Varicella virus
	<i>Vibrio</i> species
	<i>Yersinia enterocolitica</i> or <i>Yersinia pseudotuberculosis</i>

To report, call 907-269-8000; or fax 907-561-4239. Report Forms are available at:
